

Lori Kennedy Rose-Garden004cr B 20 colors Sequence A (at 34% of true size)

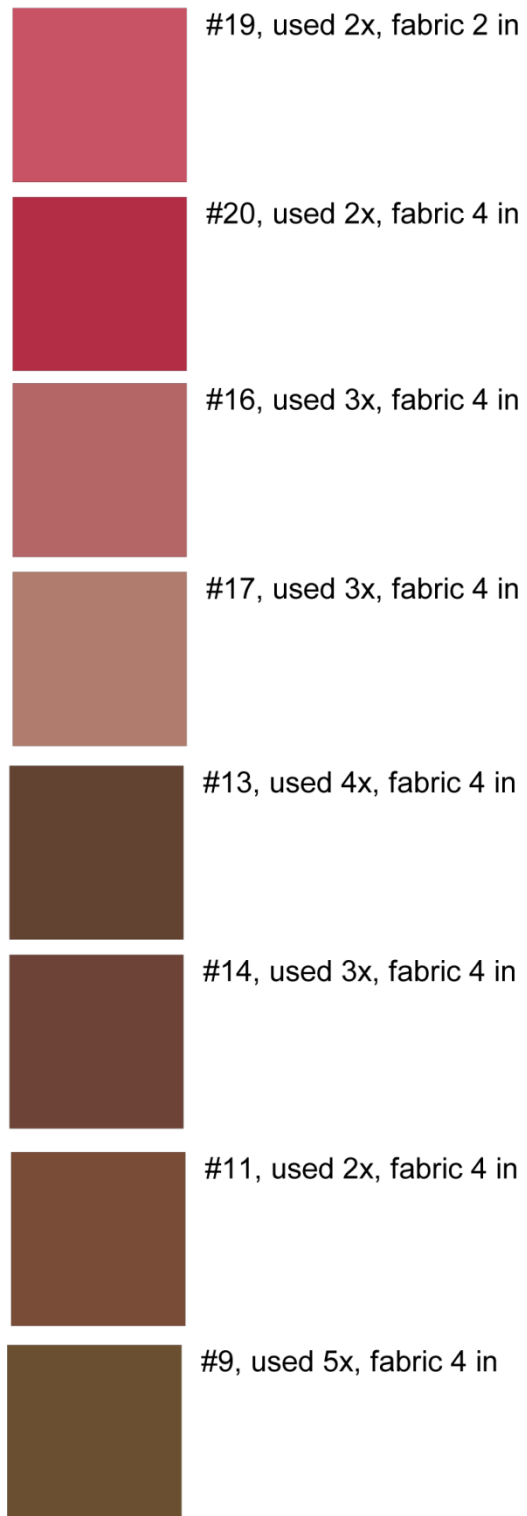

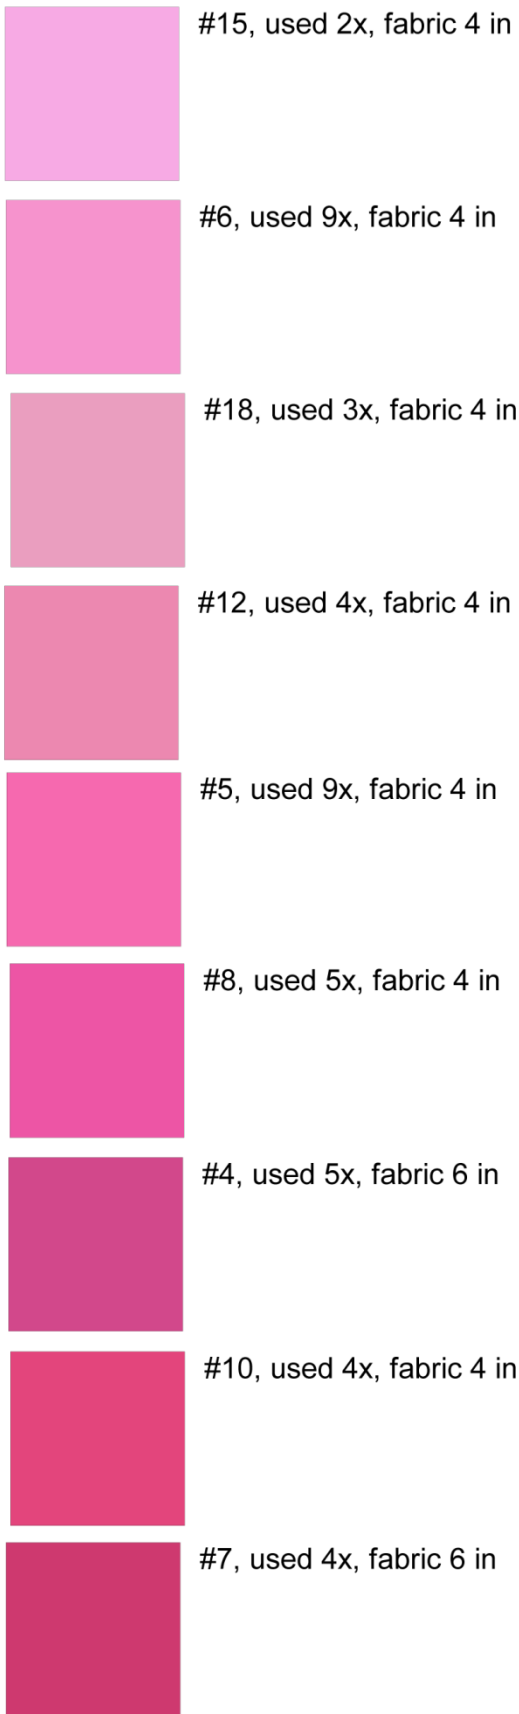

#1, used 14x, fabric 8-10 in Background

#2, used 10x, fabric 10 in Background

#3, used 4x, fabric 8 in Background

Colors are assigned numbers based, not on hue, or intensity, but by the relative amount of fabric needed. Thus, the backgrounds in this case have low numbers because a greater amount of fabric is needed compared to, say #15, the lightest pink, which is used in just two small pieces.
